DETAILED ACTION

1. This office action is in response to application No. 10/743,655 filed on 12/22/2003.
2. Claims 1-34 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-34 are rejected under 35 U.S.C. 102 (e) as being anticipated by Carr et al US 2004/0049401A1.

As per claims 1-5 and 7-34 Carr discloses a method of age verification in connection with retail sales, the method comprising of:

A machine data reader (or machine-readable), the machine data reader associated with a verification component that determines age-related data information at least on part upon encoded data on an identification card read (or data encoded on a driver's license) by the machine data reader, and a component that relays the age-related

information to a point-of-sale system in a format that is compatible with the point-of-sale system (see., abstract, page 2, [0045], page 3, [0059], page 5, [0085], page 8.

As per claim 6 Carr discloses the claimed limitation wherein the point-of-sale system comprising a display unit that displays the age-related data (see., page 5, [0085].

Please note that it is inherent to realize that the machine readable data on the card also includes the age-related data.

5. Claims -34 are rejected under 35 U.S.C. 102 (e) as being anticipated by Rogers US 2003/0178487 A1.

As per claims 1-34 Rogers discloses a Detsky age verification information system, the system comprising:

A machine data reader, the machine data reader associated with a verification component that determines age-related data information at least on part upon encoded data on an identification card read the machine data reader, and a component that relays the age-related information to a point-of-sale system in a format that is compatible with the point-of-sale system (see., abstract, figs 1, 15A-22, pages 1-8.
